

CodeTags™

Identity Made Simple and Fast

A. 1-D bar code B. Redundant 1-D bar code C. Unique Number, captured in each of the three bar codes. D. 2-D bar code E. 5/16" hole for attachment.

CodeTags™ - Simplifying Identity in Extreme Conditions

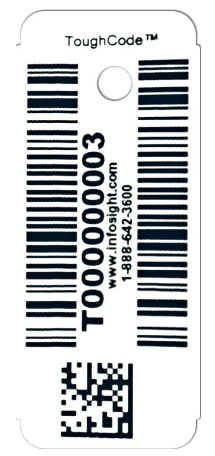

One unique number - whether in a handwritten ledger or a computer file 'in the cloud' - is all you need to identify and track parts and products. No matter if it's a computer, a galvanized guardrail or a spun-cast utility pole, that number means lifetime traceability.

CodeTags make traceability simple. Like all InfoSight tags, CodeTags survive environments that destroy most labels and tags. But CodeTags are generic - just a unique number, plus 1-D and 2-D barcodes for error-free data collection. Since there is no customization you can build a remarkably low cost asset tracking system. And CodeTags are always in stock - quick shipment for special projects, short runs, one-time or third-party jobs.

KettleCode™
KettleTag™Plus in CodeTag format.
For the **Galvanizer**: confirmation of what was received, what was processed and what was delivered.
For the **Manufacturer/Fabricator**: know what was delivered to your galvanizer... and what was returned.

ToughCode™
ToughTag™ in CodeTag format.
Perfect for quick, weatherproof identification of installed assets and materials intended our outdoor use or storage.
A cost effective way to track assets and build a traceability database.

Extraordinary Toughness + Exceptional Readability
